## Tork Starke Mehrzweck Papierwischtücher (Blau)

Artikel	130052
Rollenlänge	255 m
System	W1 – Bodenständer/W System, W2 – Innenabrollung M System
Rollenbreite	23.5 cm
Rollendurchmesser	26.2 cm
Blattanzahl	750
Blattlänge	34 cm
Hülsendurchmesser	7.1 cm
Lagen	2
Bedruckt	No
Geprägt	Yes
Farbe	Blau

Vielseitig einsetzbare Papiertücher, die ideal zum Aufnehmen von Flüssigkeiten und Abwischen der Hände geeignet sind. Dank der QuickDry-Qualität sind sie stärker und saugfähiger als normales Papier – damit Sie schneller mit dem Wischen fertig sind.

- Extra stark/saugfähig dank QuickDry
- Mehrzweck Tücher – für unterschiedlichste Wischarbeiten geeignet
- Ideal geeignet zum Aufnehmen von Flüssigkeiten
- Geeignet zum Abwischen der Hände
- Zertifiziert für den Kontakt mit Lebensmitteln

Umweltinformationen	
<b>Content</b>	The fibre composition in the product is virgin and recycled
<b>Material</b>	<p><b>Virgin fibres and recovered paper</b></p> <p>In the tissue process both virgin fibres and recovered paper are being used. In the process it is a matter of finding an efficient solution where both virgin fibres and recovered paper play a role. Different fibres demand different processes and this determines the end product properties, and makes the fibre type (recovered or virgin) less important. The environmental benefits and economic feasibility of recovered paper as a raw material source depend on its availability, transport distance and the quality of the collected material. Bleaching of fibres is a cleaning process of the fibres and the aim is to achieve a bright pulp, but also to get a certain purity of the fibre in order to achieve the demands for hygiene products and in some cases to meet the requirements for food safety. There are different methods used today for bleaching ECF (elementary chlorine free) where chlorine dioxide is used, and TCF (totally chlorine free) where ozone, oxygen and hydrogen peroxide is used.</p> <p><b>Chemicals</b></p> <p>The chemicals used in the process as well as the functional chemicals are assessed from an environmental, occupational health and safety and product safety point of view. The used functional chemicals are: Wet strength agent, Dry strength agent, Dye Fixing agents, Fluorescent whitening agent, Glue Softeners. The process chemicals are: Antipitch Protection agent, Yankee coating, Defoamer, Dispersing agents and surfactants, pH and charge control, Retention aids, Broke treatment chemicals, Drainage aid.</p> <p><b>Product safety</b></p> <p>The product fulfils the legislative requirements for food safety. Packaging Fulfillment of Packaging and Packaging Waste Directive (94/62/EC): Yes Environmental label Ecolabel This product does not have an ecolabel Date of issue 2006-06-12 Revision date 2010-02-25</p>
<b>Production</b>	This product is produced at Kostheim mill, Germany. Kostheim mill is certified according to ISO 14001 and EMAS.
<b>Destruction</b>	For disposal of used product please contact the local authorities. The packaging can be used for material recovery or energy recovery
