

## TECHNICAL NOTE

### Anti Frost Scheibenreiniger Konzentrat

#### **Application area:**

Powerful cleaning and antifreeze concentrate for the windshield wiper system. DEKRA-certified formula.

#### **Description and features:**

- Concentrate for windshield and headlight washer systems for thorough, streak-free cleaning of the windshield. Prevents freezing in the entire windshield washer system.
- Guarantees reliable antifreeze protection down to -30 °C and is suitable for fan nozzles
- Prevents re-freezing and is very compatible with materials

#### **Application:**

Mix with water, taking into account the outside temperatures, and pour into the windscreen washer system reservoir to provide adequate antifreeze protection. For an antifreeze

- Down to -10 °C in a ratio of 1:2
- Down to -20 °C in a ratio of 1:1
- Down to -30 °C in a ratio of 2:1
- Down to -50 °C in a ratio of 1:0

For optimum cleaning effect, use of the undiluted concentrate is not recommended.

#### **Technical data:**

|                         |                                 |
|-------------------------|---------------------------------|
| Appearance:             | Petrol colors                   |
| Smell:                  | perfumed, pleasant winter scent |
| Density at 20°C:        | 0,925 – 0,945 g/ml              |
| pH:                     | 7,5 – 8,5                       |
| Miscibility with water: | miscible in any ratio.          |
