No other information available.

SECTION 6: ACCIDENTAL RELEASE MEASURES

6.1 Personal precautions, protective equipment and emergency procedures:

Avoid contact with eyes and skin. Use personal protective equipment.

6.2 Environmental precautions

Contain spilled product on land, if possible. The product is at first insoluble and floats on water. Upon longer exposure to liquid water, particularly in the presence of surfactants, the material will become

miscible with the water phase. When mixed with comparably small quantities of water, the material will eventually precipitate in the form of glassy solids which can be easily recuperated. If possible, try to contain floating material early on. Local authorities should be advised if significant spillages cannot be contained.

6.3 Methods and material for containment and cleaning up:

Prevent further leakage or spillage if safe to do so.

If the spilled material is in contact with water, alcohol hydrolysis products have the potential to create combustible gas/air mixtures. Use explosion-proof vacuums and/or cleaning systems suitable for chemical material spills.

Recommendations for personal protective equipment selection are noted above. Dispose in accordance with section 13 of this document.

SECTION 7: HANDLING AND STORAGE**7.1 Precautions for safe handling**

Avoid contact with skin and eyes.
